

Lakeland Community College HIVE Rules & Guidelines

Lakeland Community College is authorized by state law to develop and adopt rules and regulations governing the use of all College facilities. These are the College's guidelines relating to the use of HIVE.

Alcohol, non-prescription drugs, illegal intoxicants, tobacco products, and other controlled substances are prohibited.

Firearms, deadly ordnance, knives, pepper spray and other weapons are prohibited. The only exception to this rule is the authorized equipment carried by law enforcement officers or utilized in the classroom training purposes with the authorization of the campus police department.

When using the HIVE facility, students, faculty and community members must check-in with the HIVE Staff and receive instruction before using the materials and tools within HIVE.

Follow all safety instructions and posted guidelines for use of the materials and tools within HIVE.

Visitors are prohibited from locking or unlocking HIVE lab and HIVE shop doors unless directed to do so by a HIVE Staff member.

Be considerate of others; classroom activities and other organized activities may occur in HIVE. Disorderly conduct **will not** be tolerated and should be reported immediately to HIVE staff members, or to the campus police department at 440.525.7241, or dial 911 in the event of an emergency. Violation of this rule may result in the removal of the disorderly individuals by the campus police department.

Items not covered by these rules, or the written policies and procedures of the College, are at the discretion of the HIVE Director.

Violation of these rules, the College Student Conduct Code Policy, or state and federal laws may subject students to progressive discipline by application of the Student Conduct Code Procedures; exclusion from HIVE and other College facilities for non-student community members by application of the College Persona Non-Grata Procedure, and all violators may be subject to criminal prosecution.
