

Lakeland Community College  
Mandatory Student Health Requirements

The following mandatory student health requirements must be met prior to enrollment in the Health Technology programs. Clinical facilities require documentation of health requirements prior to participation in clinical experiences. Please schedule an appointment with your health care provider now. It is important for you to be aware that the process for Hepatitis B vaccinations and titers takes approximately 8 months to complete. Your enrollment in the Health Program will be delayed if these requirements are not met. All of the following requirements must be documented on Lakeland's Student Health Record Form. Students entering a Health Technology program must submit a complete Student Health Record Form 6 weeks prior to the start of class. Submit forms to:

Paula Pastor-Hinkel  
Health Services, S-011  
Lakeland Community College  
7700 Clocktower Drive  
Kirtland, Ohio 44094  
Phone: 440 525-7009 Fax: 440 525-7611

**Physical examination:** A physical examination by a primary health care provider is required. This examination may be completed within one year prior to enrollment in the program.

**Tuberculosis screening:** A two-step Mantoux is required no sooner than 6 -8 weeks prior to the start of classes. The two-step Mantoux consists of 2 injections. Each is given at separate times, 1 week apart.

Positive Mantoux TB Reactors must submit a chest X-ray report no sooner than 6 months prior to starting the Program.

**Immunizations:** The following immunizations **and** titers are required. If your titer is negative then you **must** receive a booster and re-titer 4-8 weeks later.

Hepatitis B: A series of three injections **and** a titer. It will take 8 months to complete the entire process. If the titer is negative, additional vaccinations are required.

Tetanus Diphtheria Toxoid: Basic Series plus a Tetanus Diphtheria Toxoid booster to reactivate immunity within 10 years of entering the program.

Mumps: A positive antibody titer & vaccination date.

Rubella: A positive antibody titer & vaccination date..

Rubeola: A positive antibody titer & vaccination date..

Varicella: A positive antibody titer & vaccination date..

**Do not write "had disease" for any of the above.**

**Recommended, but not required:**

Polio: A positive antibody titer.

Tdap (tetanus, diphtheria, pertussis): Tdap should replace a single dose of Td for adults aged <65 years who have not previously received a dose of Tdap.
