December 22, 2020

Dear Future Dental Assisting Student:

I am writing to you today to express my excitement related to the new Dental Assistant program being developed at Lakeland Community College. There has been a growing need for qualified personal in the dental field in Lake and Cuyahoga counties. Over the recent years the existing programs have closed and have not been replaced. This in turn has led to a decrease in dental auxiliaries entering the work force. The demand for such auxiliaries has thus grown. With the credentialing being developed at Lakeland's Dental Assisting program I can see that graduating dental assistants will have no problem finding gainful employment in the two counties. Anyone looking to become a positive contributor to their community would be well served in undertaking this new and exciting program.

Sincerely,

Jeffrey C. Bailey, DDS.
